THE reason for gold Democrats calling themselves the Jeffersonian Party," is a mystery to those of the party who are for silver. Jefferson insisted that the majority shall rule. The majority of Democrats assembled at Chicago nominsted a ticket and adopted a platform and these are the regular nominees and the regular platform and the only ones that can be acceptable to "Jeffersonian Democrats.

LI HANG CHANG, the greatest living Chinaman, arrived in this country on Friday and was received with distinguished honors. During his stay in New York every courtesy will be paid him, but his visit will be extremely brief, and, it appears, will not extend further west than Philadelphia. This week he will go to Canada, and thence across the Pacific to his home. It is quite possible that he would not have set his foot on been for diplomatic reasons. He is fully conscious of the indignities to which his countrymen have been subjected in America, as well as of the unjust laws which have been passed, in flagrant violation of treaty obligations.

To the declarations by gold standard advocates that the mass of workingmen will not support Bryan and Sewall labor makes its own answer. Not a single labor paper in the United States is for Hanna and McKinley.

Not a single labor leader of national influence who does not speak for the cause of Democracy as the hope of the

Some labor papers have thus far remained noncommittal, as it is the avowed policy of a few such journals and of certain labor organizations to reserve political action to the individual. But all of the other labor papers, except these few, are openly for the Democratic candidates and the Democratic platform.

My friends, there is one way of taking the government out of the clutches of those who have been bleeding it. It is for the government to resume its legal rights and use its silver or its gold whenever it pleases, whenever it has a party yet follow the teaching of these a dollar to pay.

I do not want to be called extreme, but I want to state my position with such emphasis that it will not be mistaken. I believe that the American people have a right to have the treasury department administered in behalf of all the people, instead of in behalf of syndicates, foreign or domestic. Instead of permitting the financiers of Wall street to call before them the offl cials of the government and to tell them what they must do, I believe that the time has come when the officials of the government must call the financiers bedo and make them do it.

If this government is not greater than the bankers of Wall street, it is no gov-Ernment at all. If we once concede that to exist, how do we know how much | ticket will draw more votes from Bryan they may charge us for letting us live? -William J. Bryan at Buffalo.

On our local page will be found the proceedings of the Democratic county convention, held in this place on Monday. While there may be some disappointments, as there always will be attending all political gatherings, the work of the convention taken as a whole stands out prominently as the work of men anxious to perform their duties faithfully and well, without any dictation, and for the best interests of the party they represent, and the people whom the candidates nominated, if elected, will serve.

We invite our Republican brethern to stand the Democratic county ticket up alongside of their own and if there is anything in the mode of nomination, in the standing of any of the candidates in the communities in which they live that invites or repels the support of any candidate, on either ticket, to cast their vote at the election for the candidates that will require no apology to their conscience for the act.

The Democratic candidates are men onnel of the ticket.

It each member of the committee had seen fit to tip up his own individual business the offense against the proprieties and good manners by one, would not have been so glaring. Mr. Sheridan is an engineer on the railroad and of course is not in a competitive business that needs nursing or advertising, but Mr. Bower could have mentioned that any unseasonable goods at his establishment would be sold at cost; Mr. Luke could have commended some indorsement of the postoffice department of the p esent administration and Mr. Detrich might have invited people to inspect his stock of hard ware-it would have toned down the ticket by about 30,000 majority is the brazen impudence of a member of the result of the election in Vermont on press climbing on to the committee for the purpose of tooting his own horn The simpering pretense before the con-

It is eminently appropriate that the Republican party, lineally descended from the old Federalists, should declare for the single gold standard and the centralized monetary depotism it creates. With one-half the metallic money of the world destroyed and the remainder un der the control of a few capitalists, the malign prediction of Hamilton that the people could not govern themselves and that only a monarchical government could be permanent would be realized.

The great leaders of the Democratic party were opposed to centralization in every form, and especially to that of banks and syndicates.
